

MelodyHub

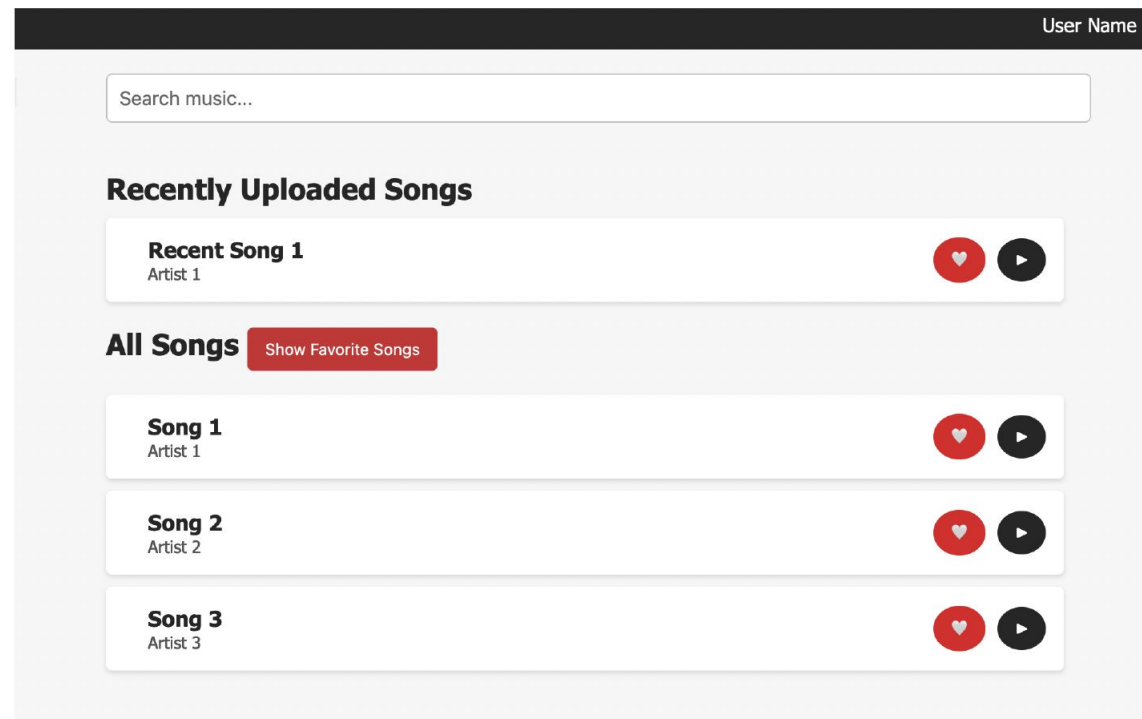

Kunle Li, Fulun Ma, Chenglin Zhang (alphabetical order)

Sprint #2 Presentation: Team 1

What is MelodyHub

A platform for users to share songs (their own singing or creation), or any interesting sounds/music pieces.

Users should be aware of the copyright of the music pieces.

What is MelodyHub

List of functionalities

1. **Registration and Login feature:** OAuth and email verification
2. **Music Upload:** Upload and delete
3. **Music Browse:** Main page and all songs page, like/dislike music
4. **Search:** Songs, Playlists, Users
5. **Detailed Pages:** Songs, Users, Playlists
6. **Music Play:** Minimize
7. **Music Playlist:** Create, Delete
8. **Listen Together:** WebSockets live listening room

Feedbacks we received from last time

1. **Focus on Listen Together Rooms**
2. **Outdated front-end design**
3. **Recommendation systems / Search engine**

What we have now: Sprint #2

1. **Music Browse:** Main page and all songs page, like/dislike music
2. **Search:** Songs, Playlists, Users
3. **Detailed Pages:** Users
4. **Listen Together:** WebSockets live listening room (music sync), working on the chatting feature
5. **Frontend:** some frontend design

Original Goals

1. **Music Browse:** Main page and all songs page, like/dislike music
2. **Search:** Songs, Playlists, Users
3. **Detailed Pages:** Songs, Users, Playlists
4. **Music Play:** Minimize
5. **Listen Together:** WebSockets live listening room
6. **Frontend:** some frontend design using Bootstrap

What we want to do next

1. **Email Verification**
2. **Ajax update of the current Listen Together Rooms, and recently uploaded songs**
3. **Listen Together chatting, song selection, show the number of participants, and deletion**
4. **music detail page**
5. **when we change pages, for example, from main page to user profile page, the music being played will not be interrupted**
6. **Cloud deployment on EC2**
7. **Details: register transactions, chatting rooms racing conditions, minor bugs, frontend improvement**

Backlog is in the GitHub issues in our groups repository

Obstacles

Frontend design is difficult
